Intelligent Computer Entertainment Laboratory
Report No. 1*

Week: 1 and 2 Date: 16/ 4 / 2026
Name: SI THU AUNG Student ID number: 2600240484-1

In-laboratory research work (*add lines as necessary*):

On 8/ 4 worked from 15:00 to 16:30 (1.5 hours), Attended the lab introduction session and learned about the DareFightingICE competition. Reviewed the project requirements and explored the GitHub repository structure.

On 10/ 4 worked from 15:00 to 16:30 (1.5 hours), Installed the Fighting ICE environment and necessary tools. Tried running sample AI programs and understood the basic execution flow.

On 12/ 4 worked from 15:00 to 18:00 (3 hours) Studied the existing AI code and analyzed how agents make decisions during gameplay. Reading the paper.

On 14/ 4 worked from 13:30 to 16:30 (3 hours), Testing on Anydesk (remote desktop software) and on our macOS and began understanding how to modify AI behavior for the competition.

On 15/4 worked from 15:00 to 16:30 (1.5 hours), Discussing the strategy with the professor and getting advice and learning methods to improve efficiency.

A total of 10.5 hours of work at the laboratory**.

Also, I am reading the following scientific/technical paper(s)
https://arxiv.org/pdf/2203.01556

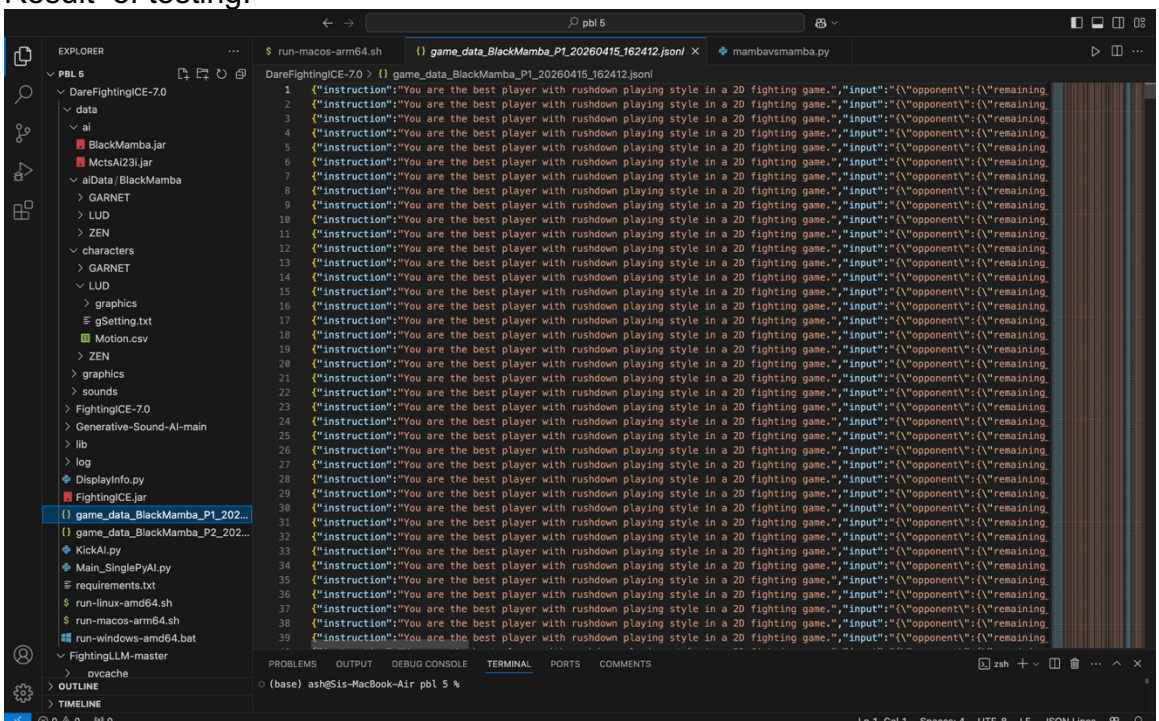
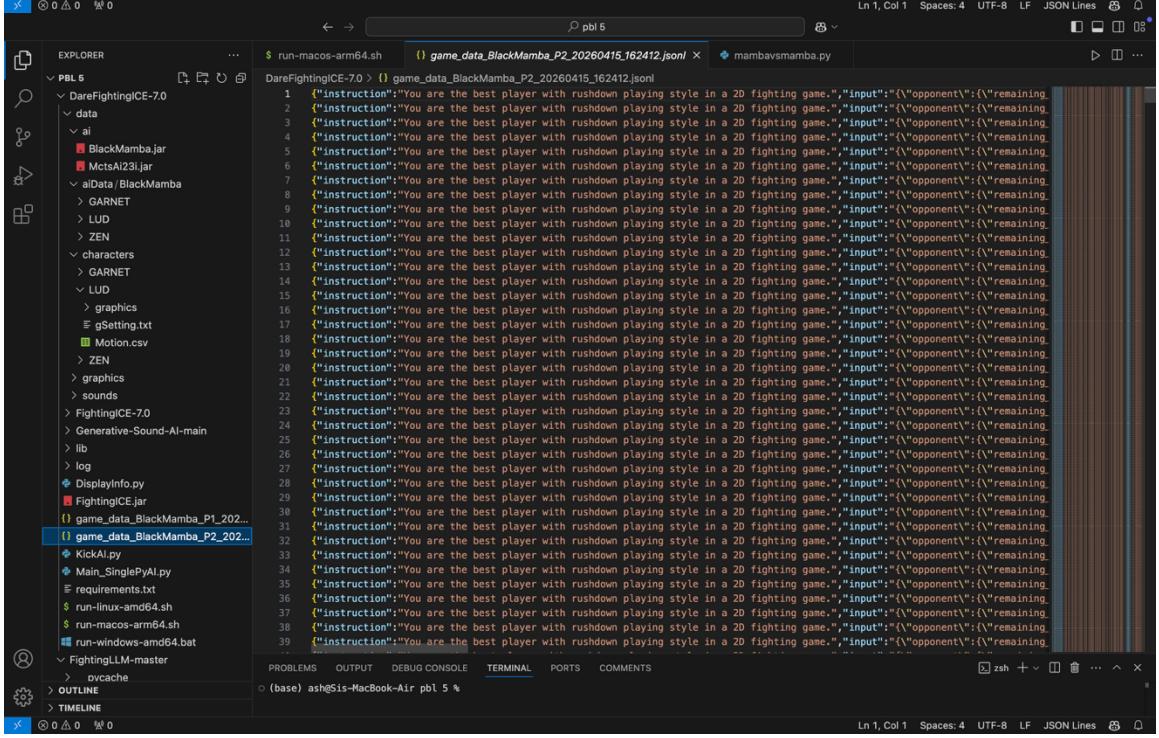
(*importance/usefulness/relevance/contributions*)
This paper introduces the DareFightingICE competition, where AI agents are developed to play a fighting game using only audio information. The study focuses on how AI can make decisions without visual input. It is also useful for understanding the rules and objectives of the competition. It also shows how AI can be applied to support accessibility, especially for visually impaired users.

Result of testing:





* Each EPBL-5 student must submit at least 12 reports for evaluation.
** Every EPBL-5 student must work at the laboratory at least 9 hours per week (including the class hours).
*** Each EPBL-5 student must read at least 7 papers during the course time.
**** Every EPBL-5 student must make at least 3 presentations (including the final presentation on Week 14).
